

THE TRAVEL COMPANION APP

Keeping travellers informed wherever they are

MOBILE ITINERARIES

In today's mobile-first world, travellers expect a seamless experience with instant access to trip details on their smartphones and tablets. While email attachments bring itineraries into the digital sphere, they fail to address the real-time demands of modern travel, leaving clients feeling unsupported precisely when they need you most.

Tineri eliminates these challenges, offering travellers access to real-time updates and essential information across mobile, tablet and desktop so they can travel with confidence!

Not everyone is tech-savvy, so the fact that Tineri is **simple and easy to use** means a lot to our customers.
